WEATHERWEAVE

trailers kits & conversions

Introduction

Weatherweave is a creative and ambitious business, developing solutions and products for the motorsport and transport industry. One of our notable strengths, is being able to manufacture all of their components in-house. We work with you to create and realise your requirements, designed and built to the highest standard by a professional team of specialists. We manufacture frames and covers for any open trailer and with our bespoke service we can upgrade your car transporter or flatbed to be fully enclosed. The conversion is tailored to the way you use your trailer, to make your life easier. With great customer service, we can work with you in creating the perfect conversion for all your needs. Just give us a call or send us an email with your trailer details and your design requirements and we will work out a solution specific to you.

**“Innovative,
simple and
robust”**

The Frame

Fabricated in house, a simple plug together and bolt up assembly system, which is fully demountable, if required.

The frame, is as standard, box steel slot together construction and powdercoated in matt black finish.

How High?

Heights of 1.4m (4ft) and 1.6m (5ft) may be an option depending on vehicle clearance.

1.8m (6ft) accommodates your average height car and is a convenient height to be able to walk inside when your vehicle isn't inside or for an alternative use.

2.0m (6ft 6inch) Recommended for larger vehicles, such as a 4x4.

2.25m (7ft 4inch) To transport larger vehicles (4x4 type), vehicles with roof racks and small vans. (We recommend this height if you are transporting a variety of size vehicles.

Having an angled front will reduce the leading height by 2ft if you are unsure about going higher.

The Cover

All of our trailer covers are manufactured from FR UV PVC. Tough and hard wearing, it is fit for the road in all weather conditions.

A choice of colours are available and as standard it comes with a translucent white roof (this allows in 40% more light), zip access anywhere you want and is secured with galvanised overcentre buckle hardware.

If you need branding, we offer an artwork and printing service too. Just tell us your ideas and we will be happy to turn your ideas into reality!

Not sure what to choose? Don't hesitate to ask for samples from our colour range (which includes our signature and 'exclusive to Weatherweave,' Carbon! A unique carbon fibre pattern on one side in dark grey, with a luxurious cream colour on the other).

Want an upgrade?

Ask us about the upgrades we can offer including a gas strut rear door, or our ladder beam design if you need full side access.

Here at Weatherweave, our experienced techs can help you achieve full potential from your conversion and we are always looking for new, innovative ways to keep evolving and remain adaptable to change and demand. Whatever your design idea is, don't hesitate to talk to us about it.

EXPLORE THE CONVERSION

Loading Door

The rear door of the trailer cover is weighted with a steel bar to help against movement when you're on the road. this can be rolled up with ease to allow easy access.

Removable Side Bars

These can be removed at any time to make your life easier when climbing onto the side of the trailer or opening a car door for access.

Side Release Buckles

Keep your panels securely in place when accessing any side.

QUALITY

Transparent Roof

Our most popular feature. The roof allows an extra 40% of light through, making it much easier to see what you are doing, even in low light.

Overcentre Buckles

These zinc plated buckles will make sure your cover is drum tight and secure, regardless if you are on the road or stationary.

Roll up Side Panels

Gain full access to the side of your trailer. Smaller side panels have also been installed for wheel bracing purposes.

Winch Hatch

Simply clip the panel up & pass your winch cable through, which gives you great visibility when operating.

Zips

High grade zips have been installed in various locations to make your day to day work as easy as possible.

GETTING TECHNICAL

All of our PVC used to make each cover is both Fire and UV rated. To allow an extra long lease of life, an anti fungal coating is also applied to help against unwanted grime.

Overall Weight of your Conversion

The complete frame and cover conversion adds approximately 180kg to your trailer.

PRINTING SERVICE

Enhance Your Brand with Custom Printing.

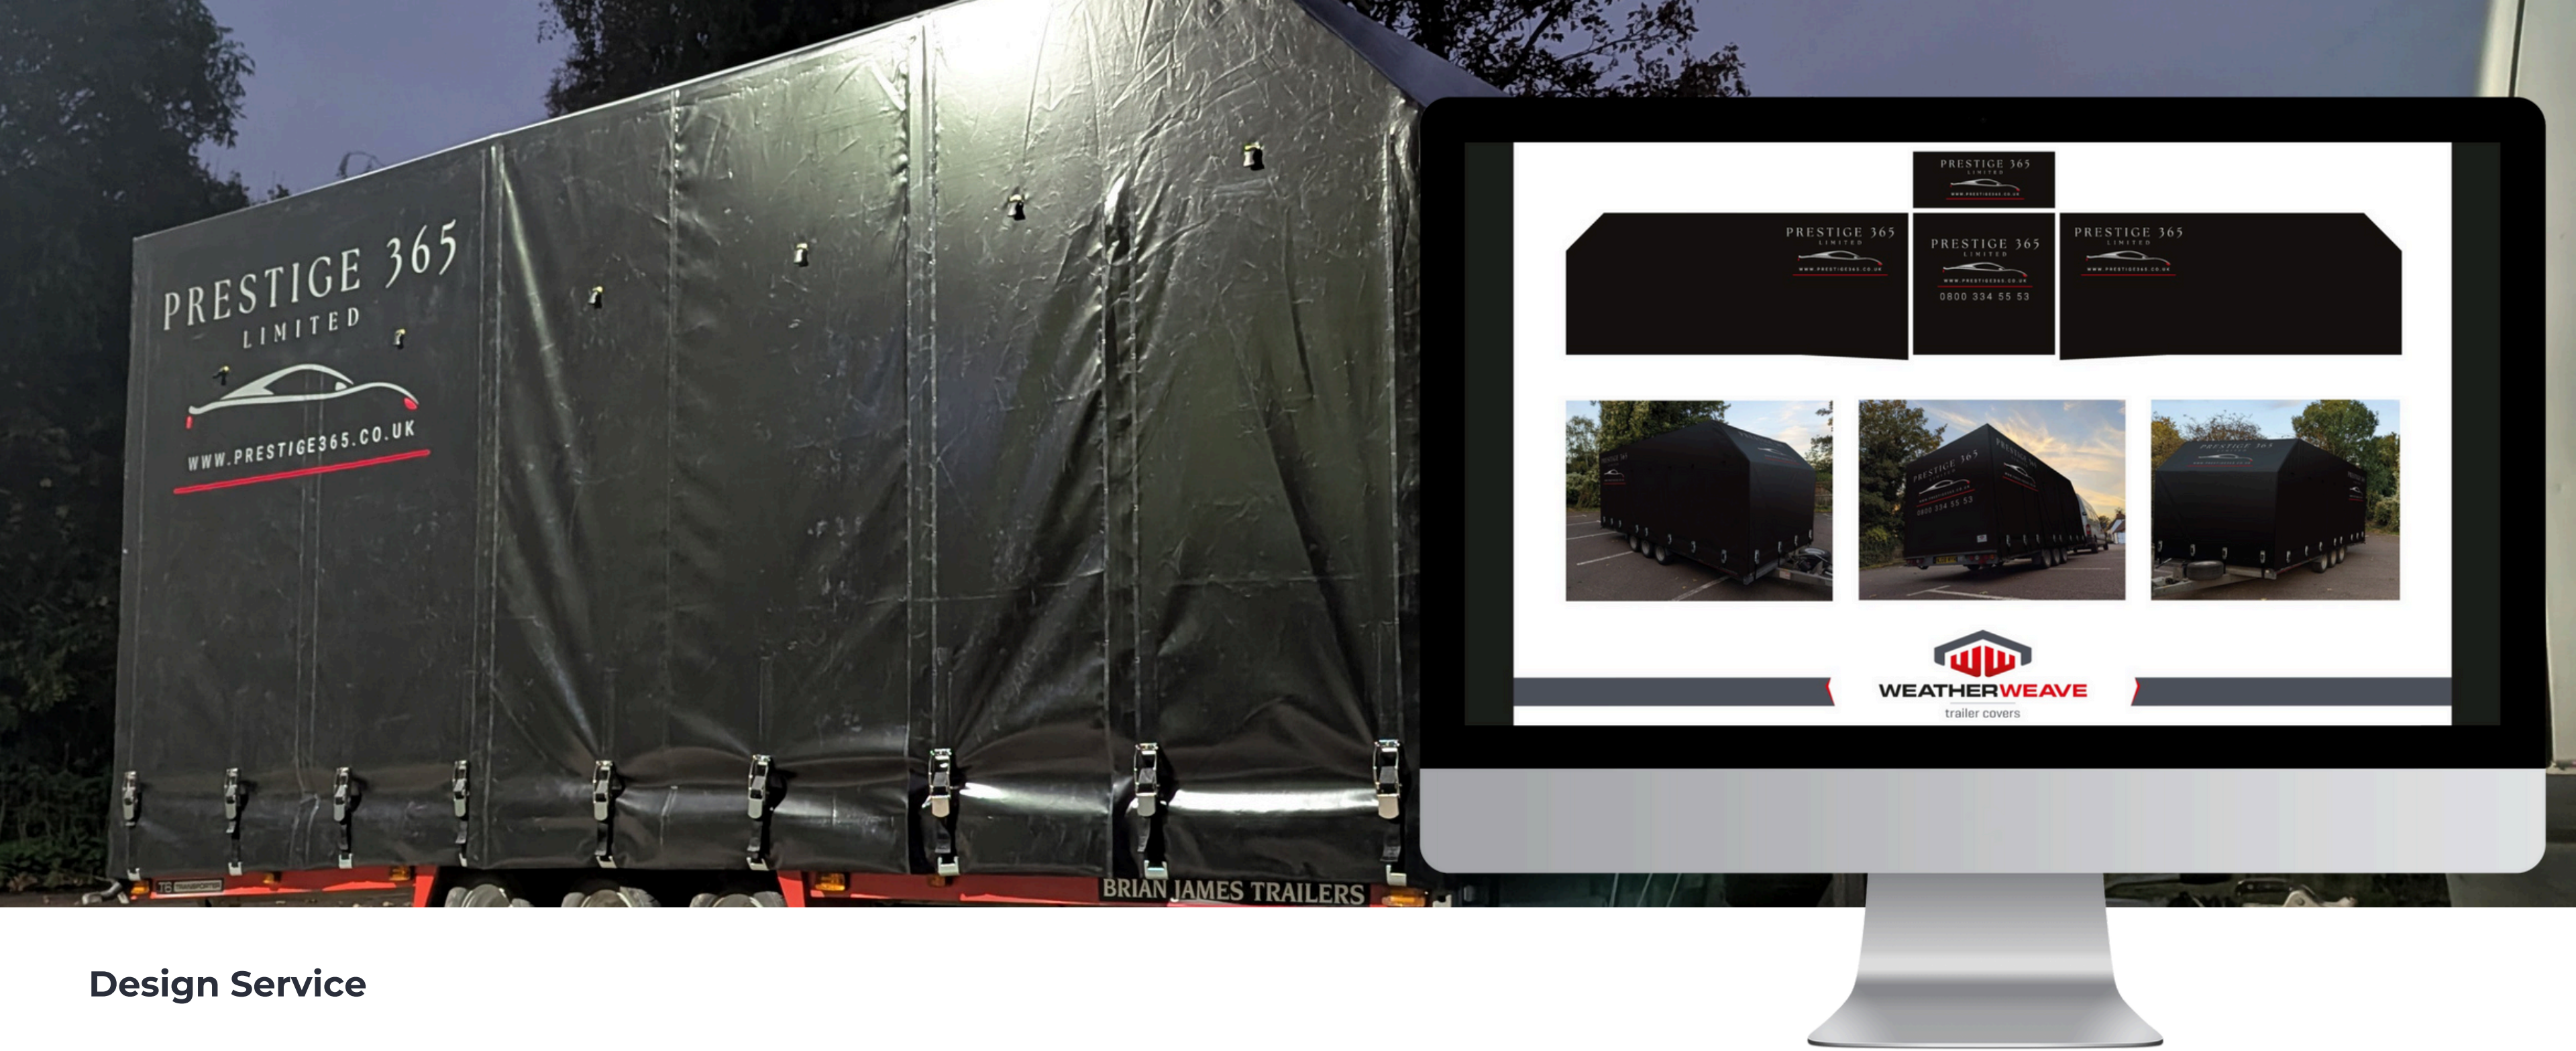

If you require company branding, our professional printing service has you covered.

We offer large-format printing for full trailer coverage or precisely applied vinyl graphics and logos for a more intricate look.

Need help visualising your design? Our graphic design service can create a detailed mock-up of your trailer, allowing you to see exactly what works best before production begins.

Let us bring your vision to life with high-quality, professional branding solutions.

Design Service

Investing in a cover conversion is a big decision. From the first conversation, we work closely with you to understand your needs and deliver a solution that is built to perform. Our in-house team ensures that everything from design to production, meets the highest standards.

On request, we offer a design service which provides you with a visual to check that everything is just where it should be. This is available, free of charge to you.

Booking In

To book your trailer in, 50% deposit is required to secure the date, with the balance due on collection.

Installation & Fit

Your trailer will need to be brought to us here at our premises in Rayleigh, Essex for the duration of the manufacture and fitting.

Production lead time is 3 - 4 weeks.

If the production lead time is too long to be without your trailer please ask and we will discuss what options there are to alleviate this.

**A Complimentary Care Pack
is now included with all of
our Trailer Conversions.**

Brian James Trailers

Since working with Graham Hathaway Racing, Weatherweave has successfully developed a 'self-assembly' kit which was released at the beginning of 2018. the kit was limited to Brian James Trailers' CarGo Connect range, which was hugely successful.

This prompted a brand new kit for 2019 which suits the Brian James Trailers' T4 and T6 Transporter.

Check our 'self build' model index overleaf.

Kit Packing & Delivery (applies to ‘self assembly’ kits listed only)

The kit is packed into 3 boxes - each measuring approximately 250cm x 30cm x 30cm and weighing 70kg.

To discuss a quote and delivery options, please give us a call.

Delivery to locations in the UK only.

Repairs, Spares & Accessories

We expect your trailer cover to provide years of reliable service, but we know that accidents happen, and wear and tear is inevitable over time.

If you need a zip repaired, a PVC patch and fix, or new accessories, just give us a call, we'll be happy to arrange a booking for sheet repairs, metalwork repairs, and servicing.

For spares and accessories, browse our online catalogue, where you'll find all the little things that tend to go missing overtime, or the parts you might need if your cover has seen its fair share of weather.

To place an order, simply call or email us, we're happy to take payment over the phone and will dispatch your items as soon as possible.

If you can't find what you're looking for, get in touch, we're always happy to help.
